

# Electronics & Robotics

Electronic prototyping  
School & College project consultancy  
IoT Projects  
Enclosures for electronic projects  
and modules

# Rain Water Meter

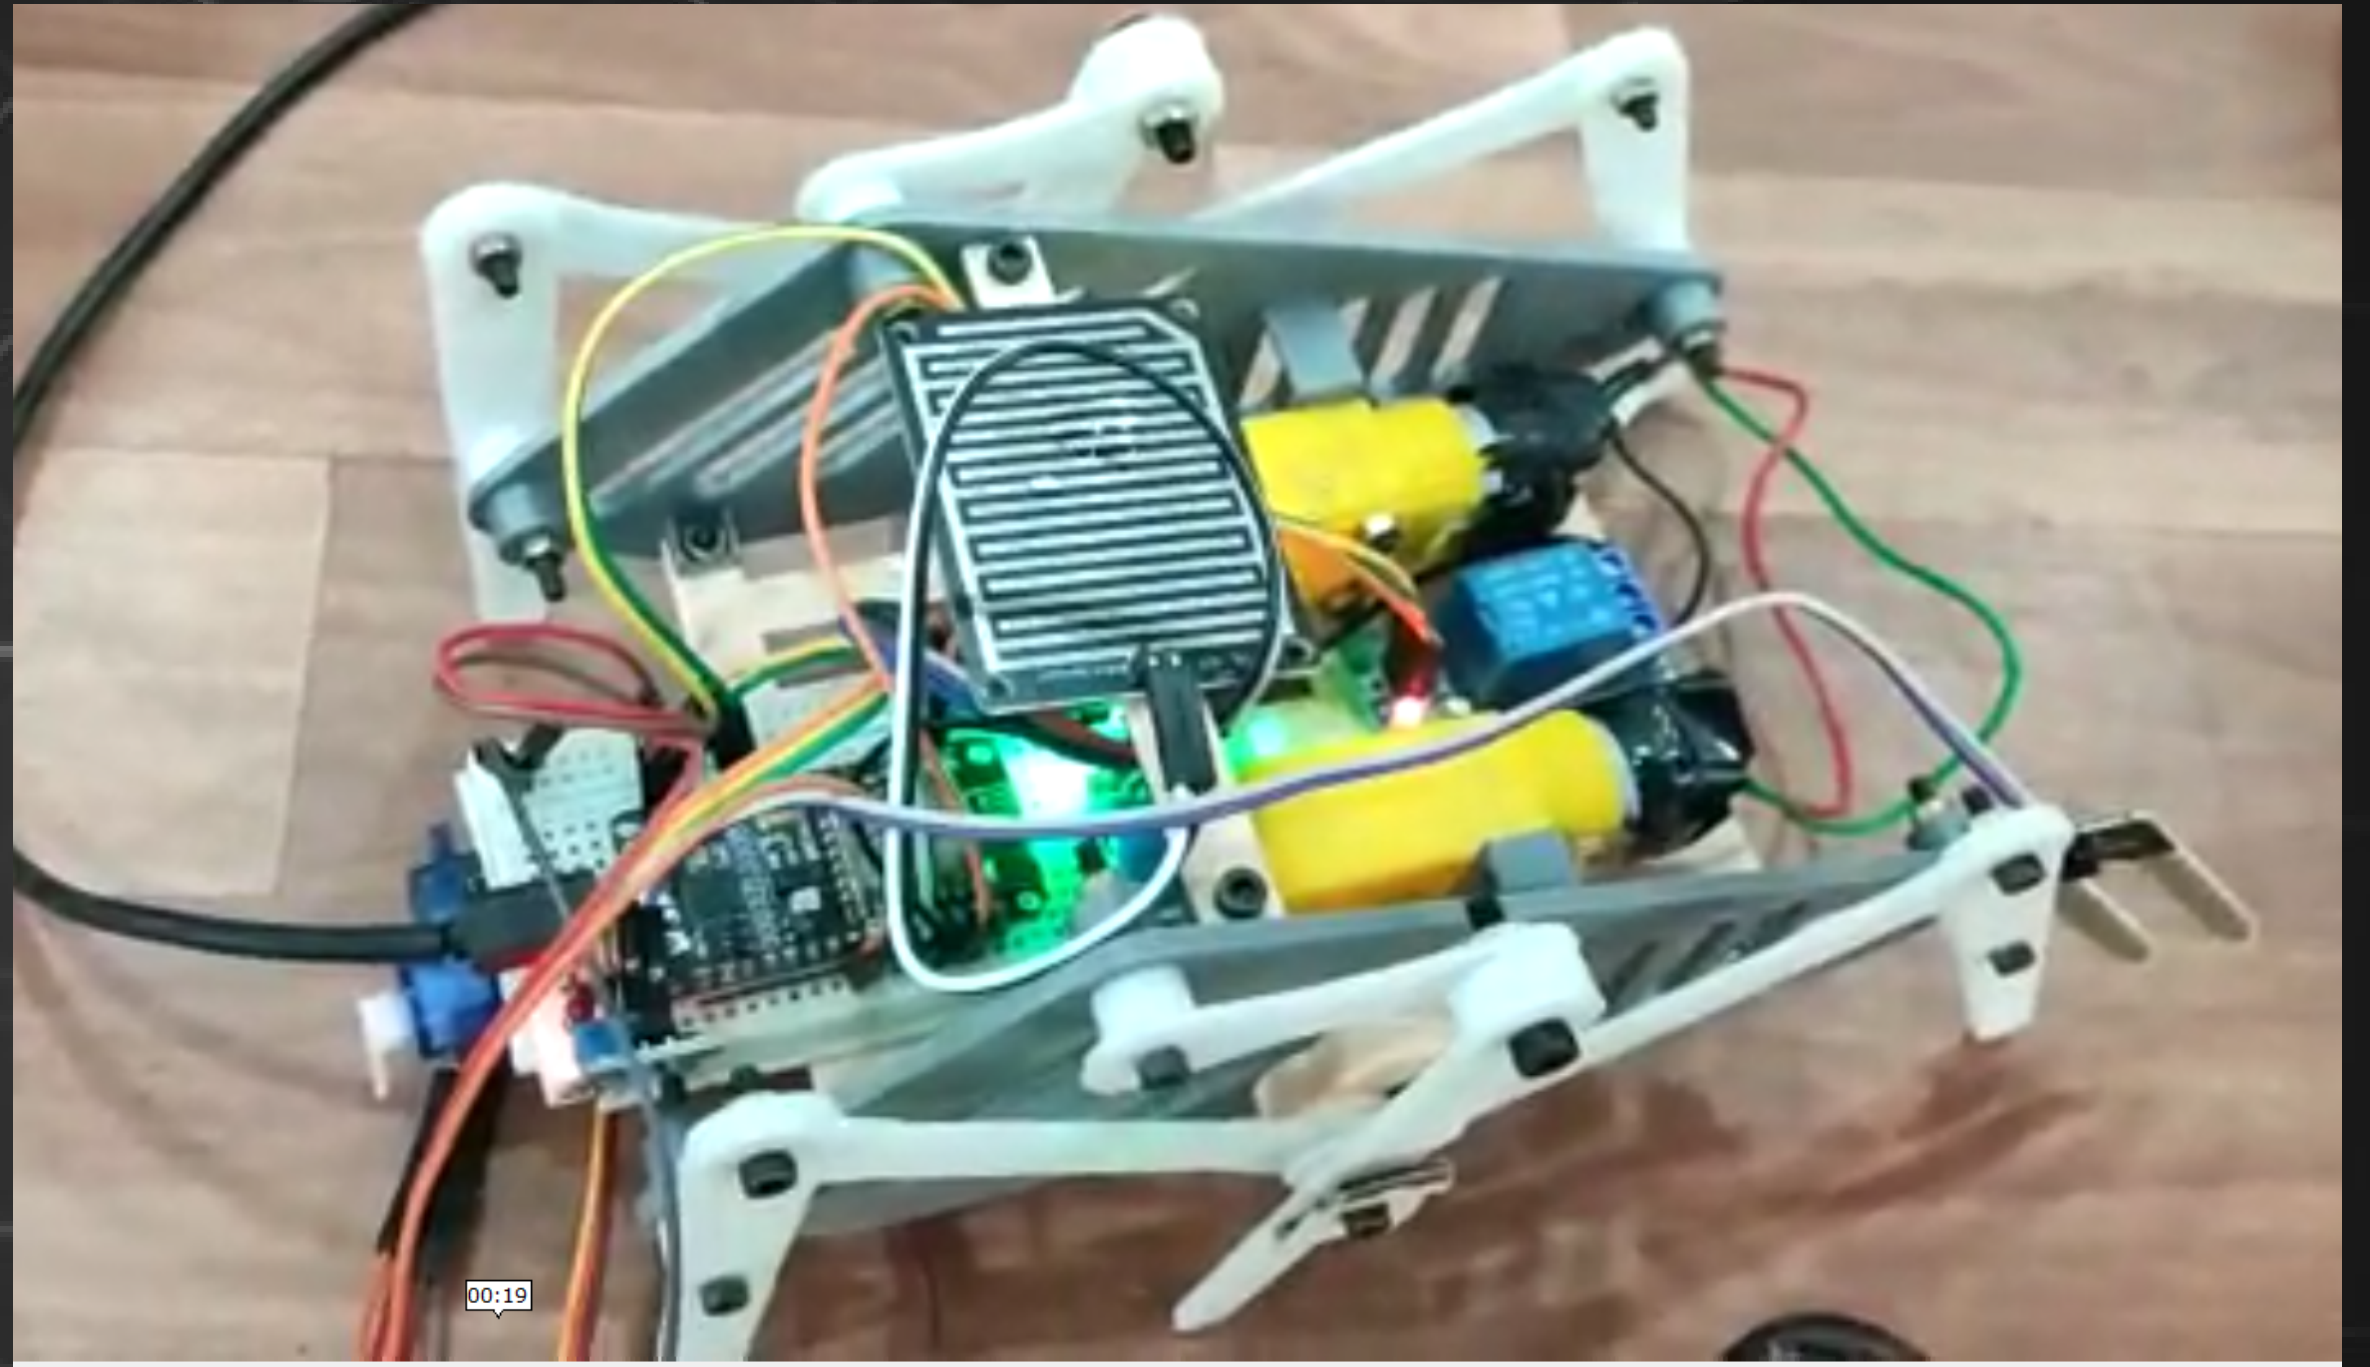

To gage and measure rain around a region

Integrated Storage module for date time and amount recording and storage  
Comes with encloser for electronics

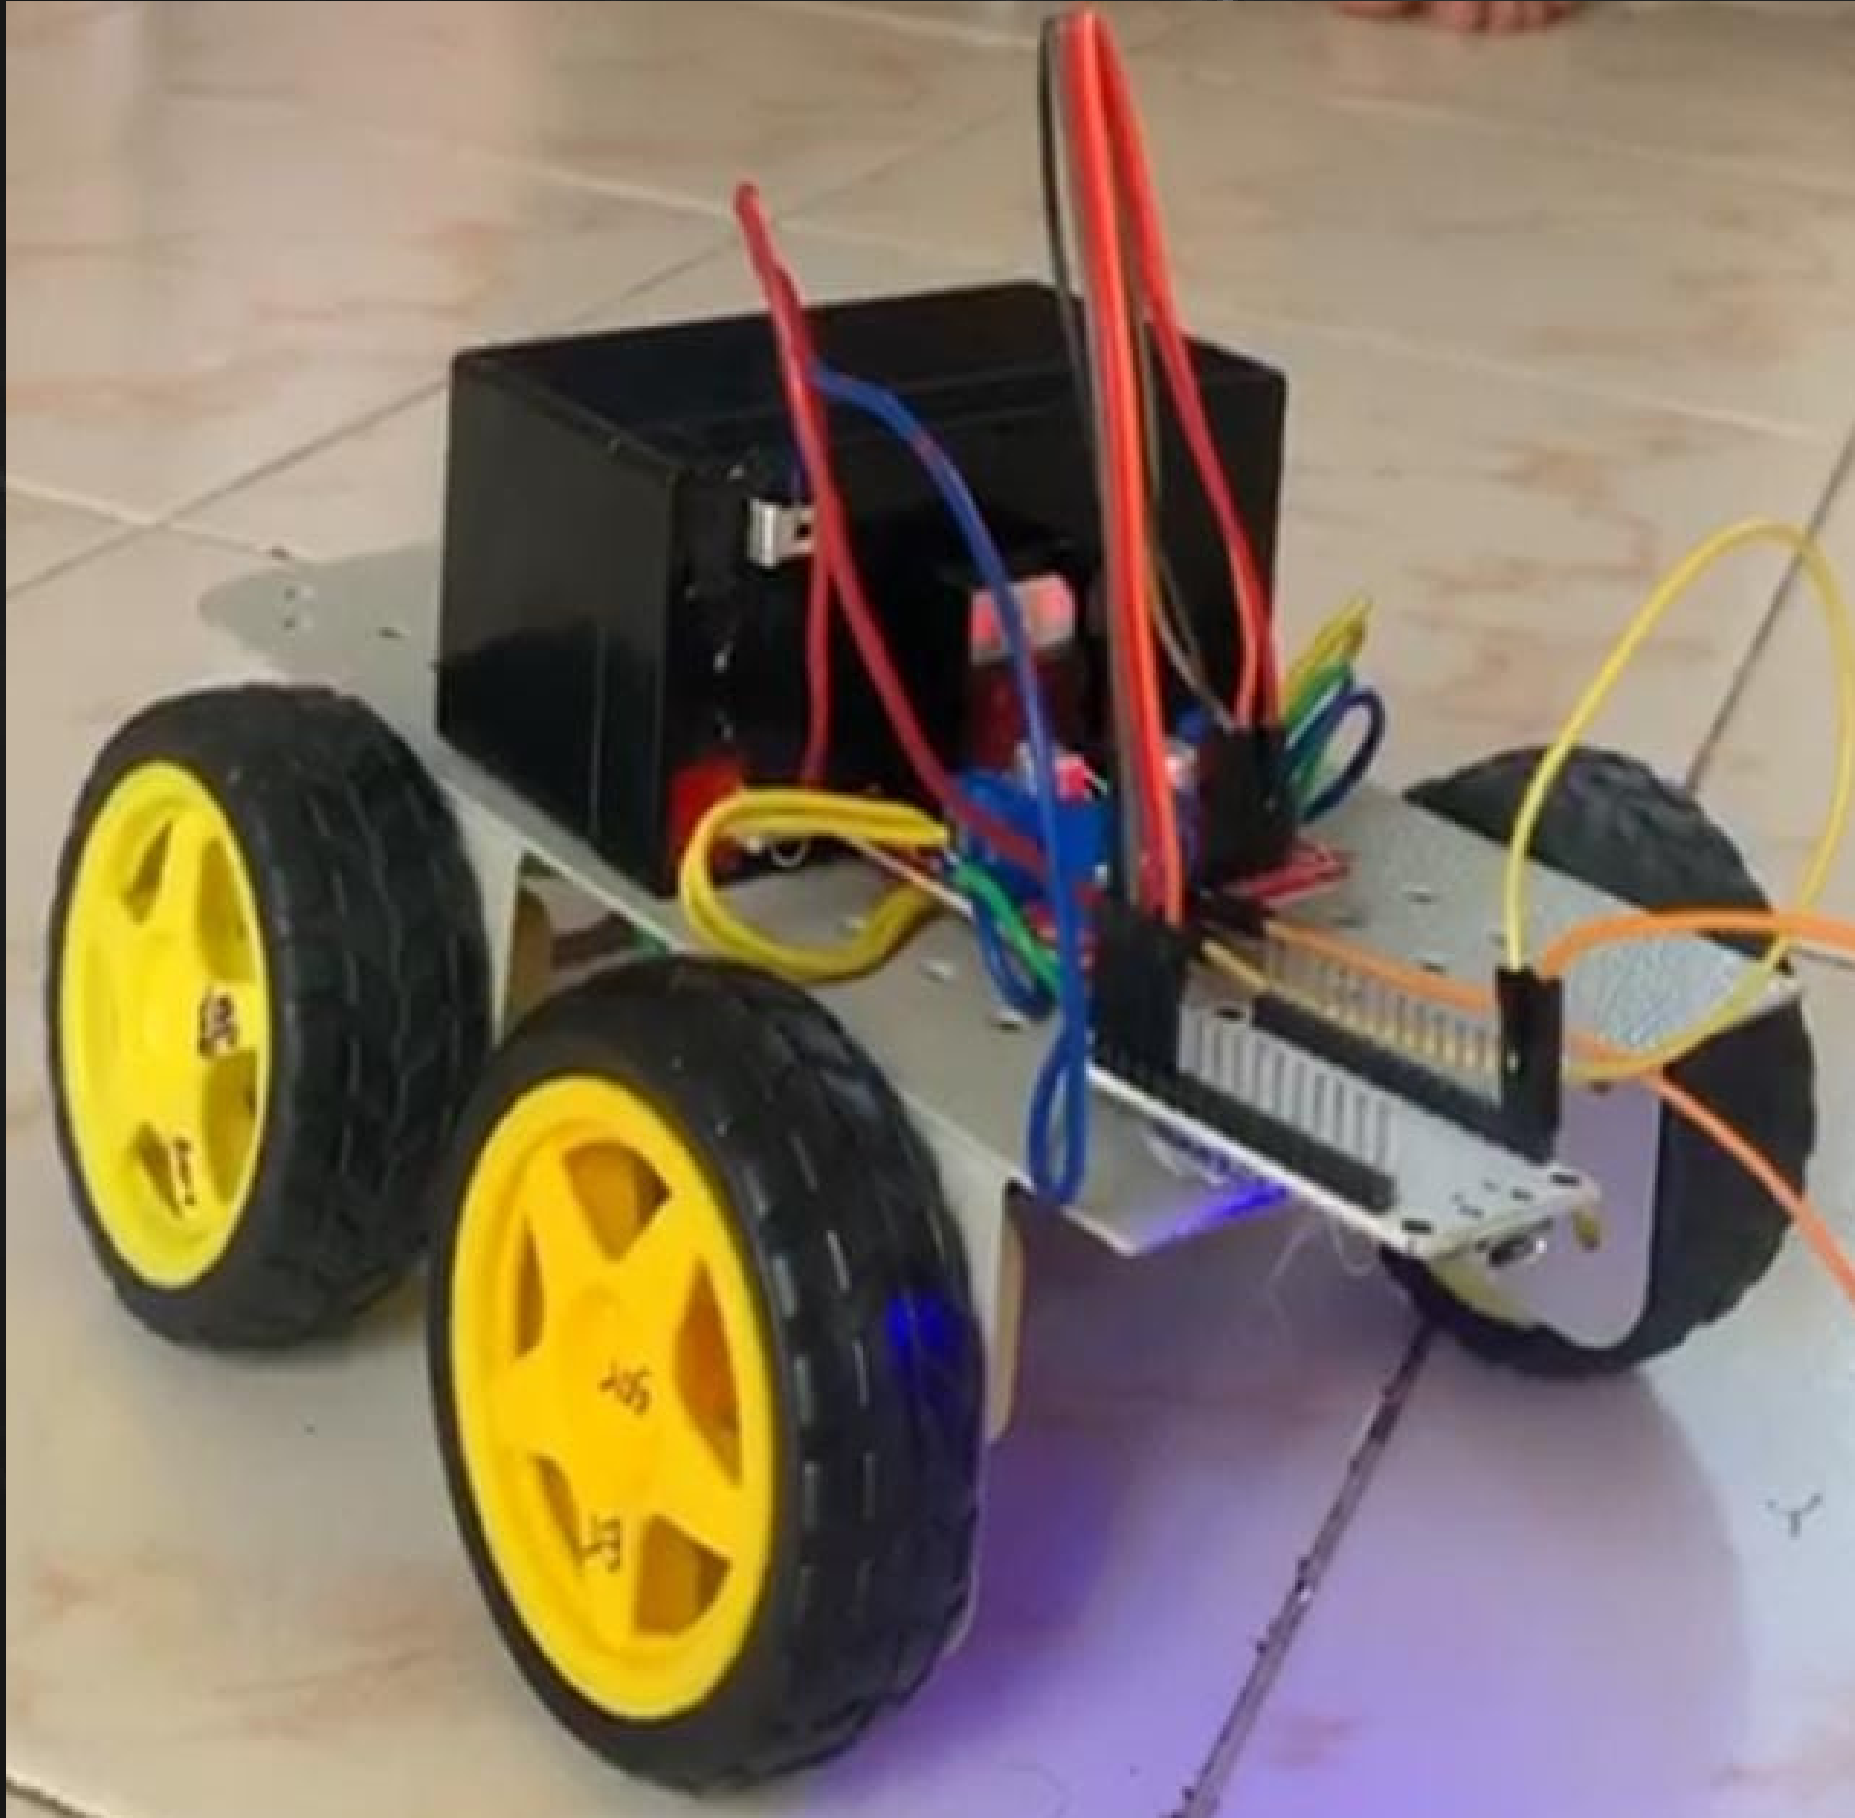

IoT bot  
Agriculture Land Monitoring  
System  
Can used as any locomotive  
wireless IoT device  
Compatible with all kind of  
sensors and actuators

Spider Bot

# IOT CAR

Battery powered wireless IoT car  
Works at long range where there is internet  
Lasts around 12hrs for a continuous run  
Compatible with all kind of sensors and actuators

## **Can be modified as**

- Line following bot
- Obstacle avoiding bot
- Racing Car
- Grass cutter etc
